Professional Summary

Mobile Software Engineer (4+ years) specialized in the Flutter and Dart ecosystem for architecting scalable, resilient, enterprise-grade applications. Extensive experience in Clean Architecture, advanced state management (BLoC, Provider), real-time gRPC and WebSocket communication, continuous telemetry, and offline-first mobile data layers. Proven cross-platform capability with React Native, coupled with Full Stack development (Next.js, TypeScript, Node.js), managing complete lifecycles from database modeling and decoupled APIs to App Store Connect and Google Play Console release management.

Key Highlights:

- Enterprise Flutter Engineering: Refactored and developed large-scale international and domestic enterprise mobile applications with Flutter, Clean Architecture, and BLoC (Meta/Michelin, Setteone, ArenaX).
- Quality & Test Coverage: Elevated unit and widget test coverage with Mockito from <5% to over 95% across an international enterprise codebase, drastically reducing regressions.
- Real-Time Telemetry: Engineered resilient vehicle fleet telemetry streaming via gRPC and WebSocket, integrating offline-first persistence with SQLite, Hive, and Firestore.
- Full Stack & Store Delivery: Complete publication lifecycle across Google Play and App Store, complemented by web admin portals in Next.js and backend services in Node.js with Redis.
- Technical Mentorship: Mentored a cohort of 12 engineering students from UCB on the ArenaX project and ongoing technical mentoring for developers.

Currently focused on engineering scalable enterprise mobile applications with Flutter and Dart, combining Clean Architecture, automated testing, and seamless cloud/web integrations.

Core Skills

- Mobile (Flutter & Dart): Flutter, Dart, BLoC, Provider, Flutter Modular, Platform Channels, Clean Architecture, Offline-first, SQLite, Hive, App Store Connect, Google Play Console.
- Complementary Mobile: React Native, Expo, EAS (Build, Submit & OTA), TypeScript, AsyncStorage, mobile release pipelines.
- Architecture & Telemetry: gRPC, WebSocket, real-time telemetry, SOLID, decoupled REST APIs, Payment Webhooks (Asaas, Kiwify).
- Web & Full Stack: Next.js (App Router), React.js, TypeScript, Node.js, Express, Prisma ORM, Redis (Queues & Cache), MySQL, PostgreSQL, Supabase RLS.
- Testing & DevOps: Unit & Widget Testing (Mockito, Vitest), CI/CD with GitHub Actions, Docker Compose, Firebase, Postmark API.

Professional Experience

Sistema Boss
Mid-Level Software Engineer
Apr 2026 - Present | Hybrid, Brazil

- Mobile Release Engineering: End-to-end lifecycle management of React Native / Expo mobile app, setting up EAS builds, continuous dual-store deployments, and instant OTA patch releases.
- Full Stack Modernization & APIs: Engineering across Agência Sisters and Movimento Vida 360 ecosystems, migrating PHP/Laravel monoliths to decoupled Node.js/TypeScript and Prisma APIs on MySQL.
- Web Portals & Real-Time Sync: Developing administrative web portals in Next.js and React integrated with YouTube Live API to detect livestream statuses and open dynamic check-in windows.
- Messaging, Queues & Payments: Managing asynchronous job queues and transactional emails with Redis and Postmark API, alongside automated financial webhooks with Asaas and Kiwify.

Exímia Tech
Co-founder & Tech Lead
Oct 2023 - Present | Remote, Brazil

- Product engineering consultancy delivering end-to-end SaaS platforms and mobile applications for commercial clients.
- ArenaX: Sports competition management platform built with Next.js, Flutter mobile app, and cloud infrastructure; led technical mentorship for a squad of UCB engineering students.
- Agendai SaaS: Full stack architecture of a White-Label SaaS with Next.js, TypeScript, Supabase (PostgreSQL, Realtime, RLS), React Native, and AI workflow automations.
- SGP Condomínios ERP: Architecture of an enterprise condominium management system featuring role-based access control (RBAC) and multi-tenant data isolation.

Setteone
Mid-Level Mobile Software Engineer
Nov 2025 - Apr 2026 | Remote, Brazil

- Cross-Platform Architecture: Development of an enterprise B2B CRM and field audit operations system using Flutter with strict Clean Architecture layer separation.
- Offline-First Engineering: Implementation of resilient local persistence with SQLite, cloud sync queue via Firestore, and local audio processing with FFmpeg.
- Multi-Environment Config: Structuring dev/prod environments with Flutter Flavors, predictable state management via BLoC, and automated release builds.
- App Store Releases: Executing deployments on Google Play Console and Apple App Store, including provisioning profiles, certificates, and store guidelines compliance.

Meta
Mobile Software Engineer
Jul 2025 - Oct 2025 | Remote, Brazil

- Refactoring MyConnectedFleet by Michelin enterprise app using Flutter Modular, resolving technical debt and tracking global vehicle fleets via WebSocket and gRPC (BLoC state).

- Developing new user interfaces and integrating payment APIs using Platform Channels for native platform features within agile teams (Scrum/Jira).
- Elevating unit test coverage from <5% to over 95% across 30+ features using Mockito, significantly boosting production stability.

Federal Regional Court - 1st Region (TRF1)
Fullstack Software Engineer
Apr 2022 - Apr 2024 | Brasília, Brazil

- Built internal Linux server monitoring system using Python and Flask.
- Implemented self-hosted GitLab with Docker Compose for CI/CD test and build pipelines.
- Designed cloud infrastructure automation using Ansible playbooks.

Technical Mentorship

Technical mentor for 3 software engineers (2022 - Present): Teaching programming fundamentals, software architecture, AI tools, and engineering standards through real projects and code reviews.

Education & Certifications

- Postgraduate Degree, MIT in Mobile Development - Infnet Institute, Expected: 12/2026
- Bachelor of Science in Computer Science - IESB, Graduated: 12/2024
- English (B2+ Level) - Cultura Inglesa, Completed: 12/2023

Languages

- Portuguese: Native
- English: Upper-Intermediate (B2+)
- Spanish: Intermediate

Available for remote opportunities or relocation to the US and Canada
